

Surface mounting PIR sensor PIR004

Description	Dimension	Voltage	Load
PIR Sensor switch	45mm x 62mm	12-24VDC	Max. 4A

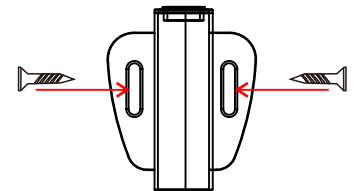

PIR Sensor Switch PIR004 is to be assembled into lighting fixtures, so the lighting fixture can automatically turn on when any part of human body is approaching within 2 meters from the sensor. The lighting fixture equipped with this PIR Sensor will stay on if the human body stays within 2 meters from the sensor. It will turn off in 40 seconds after human body move away more than 2 meters.

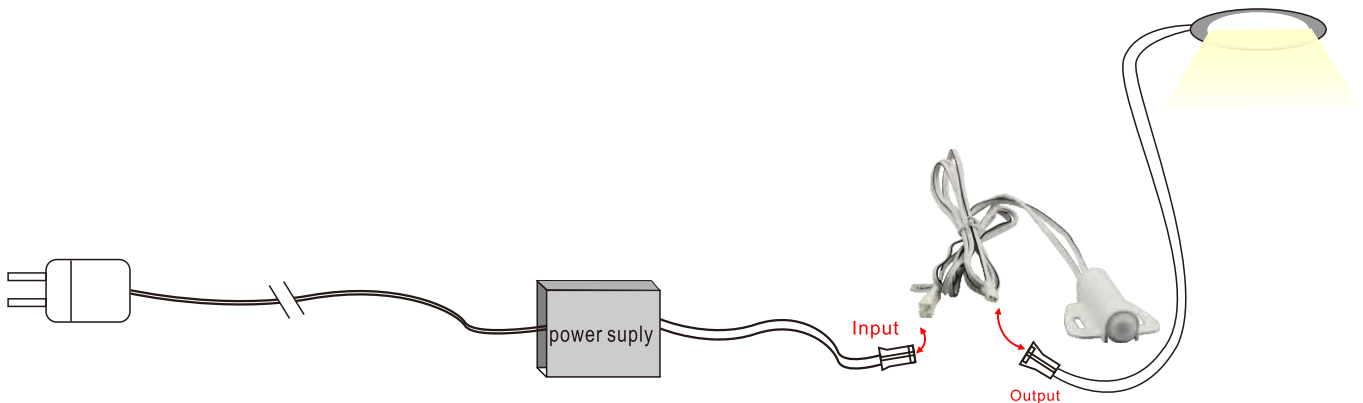

Installation Instructions:

Step 1: Install the holder part with PIR sensor.

Step 2: Fixing the holder part with two screws(M3x8) onto the wooden plate.

Connector:

Note: The function/program can be customized made upon different needs, such as longer time for stay on, etc.....
